THE ELECTRIC SCREED
BY MAGIC SCREED

The E-Screed is Magic Screed's battery-powered screed engineered for **fast and effortless concrete leveling**. Its high-frequency vibrating system helps spread concrete evenly along the full length of the blade and improves compaction. Regardless of the concrete's fluidity or the size of the aggregates, the E-Screed consistently delivers high-quality floors.

Powered by the **Cordless Alliance System (CAS) Li-HD battery technology**—the world's largest multi-brand battery alliance developed by Metabo—this battery is compatible with over 40 brands and 400 machines. It delivers professional-grade runtime, durability, and reliability, making it ideal for tough job site conditions. The E-Screed is the cleaner, quieter, and more convenient alternative to gas-powered screeds.

BENEFITS OF BATTERY POWER

ZERO EMISSIONS

- No exhaust fumes and indoor-friendly
- Lower environmental footprint
- Complies with strict emission regulations

QUIETER OPERATION

- Less noise than gas engines
- Reduce strain on worker's hearing

NO FUEL AND LESS MAINTENANCE

- No fuel to buy, store, and transport
- Safer work environment
- No carburetors, spark plugs, air filters

INSTANT START AND CONVENIENCE

- No recoil cord to pull
- No need to warm up the engine in cold weather

SPECIFICATIONS

POWER UNIT	DS BRUSHLESS MOTOR 36V, 15AH, 550W
BATTERY TECHNOLOGY	METABO Li-HD, 18V, 10 AH
HORSEPOWER	0.73 HP / 0.54 kW
VIBRATION FREQUENCY	9000 RPM
WEIGHT (NO BLADE)	37 LBS / 16.78 KG
ACCELERATOR	TWIST THROTTLE
CONTENT	<ul style="list-style-type: none">• 2 BATTERIES• DOUBLE CHARGER• CARRIER

By combining the industry-leading expertise of Magic Screed with Metabo's advanced and proven battery technology, we deliver the most performant battery-powered screed the market has ever seen.

MAGIC SCREED SYSTEM

POWERED by
HONDA

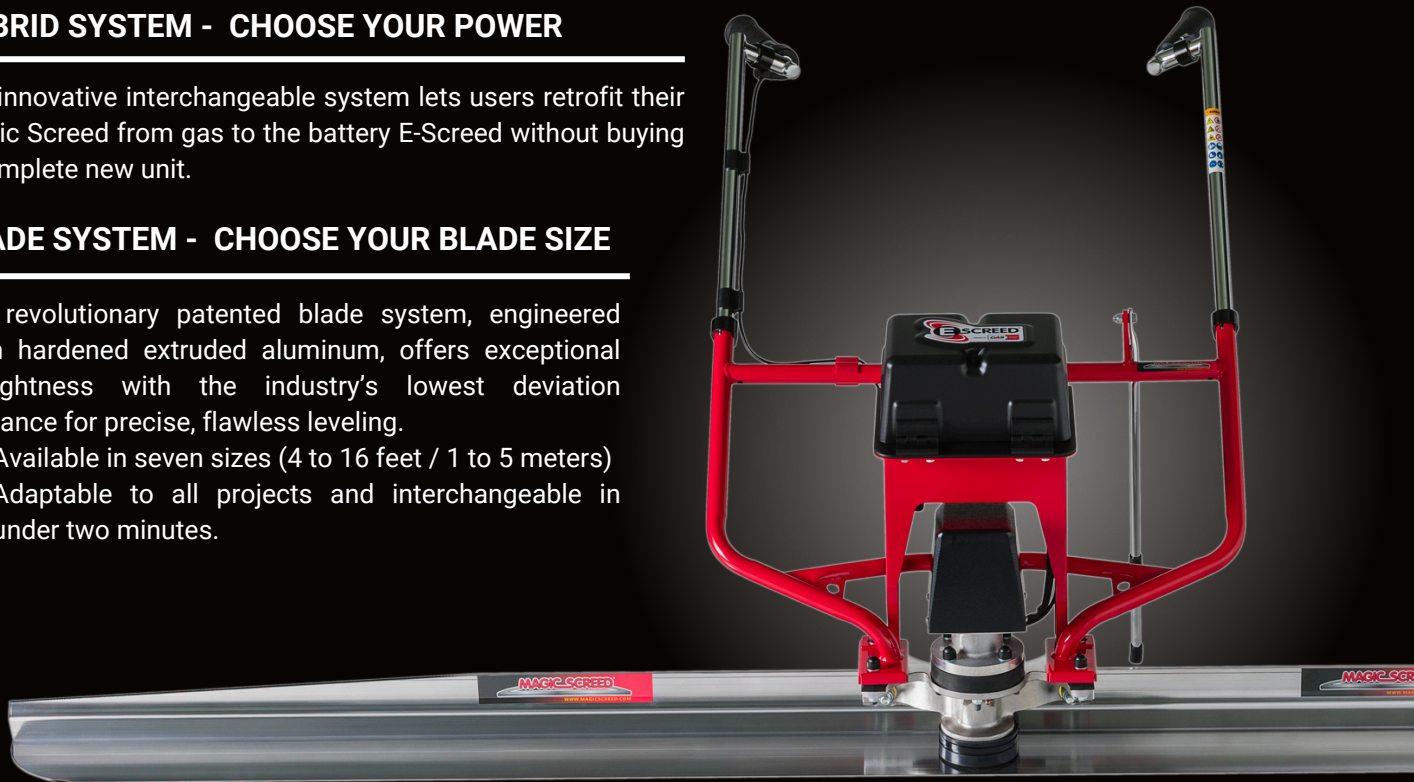

HYBRID SYSTEM - CHOOSE YOUR POWER

Our innovative interchangeable system lets users retrofit their Magic Screed from gas to the battery E-Screed without buying a complete new unit.

BLADE SYSTEM - CHOOSE YOUR BLADE SIZE

Our revolutionary patented blade system, engineered from hardened extruded aluminum, offers exceptional straightness with the industry's lowest deviation tolerance for precise, flawless leveling.

- Available in seven sizes (4 to 16 feet / 1 to 5 meters)
- Adaptable to all projects and interchangeable in under two minutes.

40 BRANDS - 400 MACHINES - 1 BATTERY
